Our Obervarsions:

Improvement

- He started aksed to food of his like and after introducing few new food items he asked for it again.
- Behavior in crowd is improved, like he does not try to run and ready to wait if asked.
- He is trying to initiate conversation sometime.
- Toilet habits are improved

Problem area:

- Humming is increased, more offen humms and when he is excited he brings his hands near mouth & chuckle.
- If idle his moving around room or on bed, is increased
- Drop pen/pencil and taking loger time to write even 1 line sentence is increased
- He sleeps late now a day though he is not sleeping in a day time.

We as parents want him to be more independent in daily routing activities, specially washroom & higene. We want him to focus in studies and social interaction and improve in sleeping.

Thanks for your support.
